

Conclusion

The St Francis Care Centre is an established organization with a strong infrastructure and a track record of credibility. During the past 20 years it has established itself as a leader in the field of life-threatening and life-limiting illnesses) in Ekurhuleni and has truly been a haven to thousands of adults, children and families infected and affected by these conditions.

None of this would, however, have been possible if it were not for the financial and other support received from our donors.

I thank you in anticipation of any support that can be given to our organization.
