

How are we funded?

The majority of our patients are indigent and are not in a financial position to contribute towards their care. We are thus in dire need of financial support to provide the best possible care to both the adults and children at our centre. We currently receive no subsidy at all from the Department of Health for the adult hospice with the result that this program is costing us R250, 000 per month and is under threat of being closed down. We do receive a subsidy from the Department of Social Development for the children's section. Unfortunately the subsidy accounts for less than 30% of our actual annual expenditure with the result that we have to raise the shortfall by doing fundraising on an ongoing basis.
