

**Once the children are with us we aim to do the following:**

- \* proper medical assessment
- \* stabilize the children medically
- \* provide therapy to address developmental delays
- \* explore family reunification possibilities
- \* find suitable host/foster/adoptive parents for the children.
- \* pre-school education (nursery school).

**We strongly believe that children should not be growing up in institutions and that every effort should be made to place children back into a family environment.**
